Subject: Damage to "people trailer"
Date: Tuesday, July 3, 2018 3:09:00 PM

Howard,

As discussed on the phone today, I discovered the left taillight/license plate holder was damaged when I went to the storage yard to replace the Ty-Wraps on the flagpole holders with metal clamps (which I completed) on the "people trailer."

I am confident that this happened since we returned the trailer to the storage yard after the Prescott Parade on Saturday, June 30, 2018. If it happened earlier, I'm sure that you, Carl, or myself would have noticed at that time.

I went to the office and identified the damage. They had me fill out an Incident Report. They will look at their video records and said they would notify me if they saw anything happening. They also will take pictures of the damage, which I have also done.

The storage yard said that I could also notify the police if we intended to submit for insurance. I don't know if the damage has caused the taillight to be non-functional. I have already looked online at the taillight replacement cost, which is estimated to be \$34.36 plus shipping. I looked at the same company where I obtained the marker lens for the taillight on the other side of the trailer. Based on the limited cost, insurance (even if it is covered, which I doubt) would not pay anything due to typical deductibles. As a result, I don't believe a police report is warranted, but if anyone feels strongly to the contrary, I can file a report.

I will add a file to the [Float Maintenance](#) page of our website with this email, the Incident Report, the photos, and the replacement taillight quote from the internet. It is more convenient than trying to load your email with large file attachments.

Dan Marks

STORAMERICA INCIDENT REPORT

Site Manager Signature: _____ Date: _____ Time: _____

Site Manager: Please fill out the form, print it out, sign it, and submit it to your DM via email.
Please include all witness statements, photos, and other supporting documents as needed.

WITNESS STATEMENT

(PAGE 2)

Property Name: Goodyear Self Storage Date: 7/3/18

In your own words, please describe what happened; you may wish to include the date, time, location, and nature of incident.

On July 3, 2018 at 11 AM I observed the
taillight and license plate mounting was
damaged and bent from contact with a
yellow vehicle based on scrapings still on the
assembly. The trailer which is stored in
space 18 at the Goodyear Self Storage was
most recently observed with no damage on
June 30 when it was returned to the
storage facility at 5 PM.
I saw no damage matching the area on the
adjacent RV parked in the next space.
The taillight is on the left side of the
trailer.

- Replaceable lens
- Stud mounts on left side of trailer with two studs on 2" centers
- Wiring design contains lead wires and ground wire
- Dimensions: 6-1/8" L x 4-9/16" W x 2-7/8" D
- Light draws 0.268/.144 amps at 12.8 volts

This is a multifunction LED stop, turn, and tail light for trailer applications more than 80" wide. This versatile light serves eight functions: stop, turn, tail, rear clearance, rear reflex, side marker, side reflex, and license plate illuminator. The main red light measures 4-3/4" square x 2-11/16" deep; the attached red clearance/marker light makes the total length 6-1/4". The attachment of the rear clearance light eliminates the need for a separate light to meet DOT requirements. The molded plastic housing and durable lens provide all-weather protection against corrosion. This light has 23 light-emitting diodes which draw 0.268/.114 amps at 12.8 volts. The light features a screw-down, replaceable lens. The light is a universal mount with two studs on 2" centers.

Manufacturer Specifications

Universal stud-mount stop, turn and tail lights for trailers over 80". The 8-function: stop, turn, tail, rear reflex, side marker, rear clearance and side reflex with license plate light. Features built in rear clearance light eliminating the need for separate light to meet DOT requirements. All weather molded plastic housing and durable lens protect against corrosion. Mounts on 2" centers.

Video Transcript for Optronics Trailer Lights STL3RB Review

Today we're going to be reviewing part number STL3RB. This is the Square LED Trailer Tail Light with the License Plate Light for the left hand side of your trailer from Optronics. The red, square trailer light is going to serve 8 functions for trailers more than 80" wide such as your Stop, Turn, Tail, Rear Clearance, Rear Reflex, Side Marker, Side Reflex, and License Plate Illuminator. It has a corrosion resistant design. It's going to feature 23 LEDs and it also features a replaceable lens. The stud mounts on left side of your trailer with two studs. If we measure the distance that we have between these two, center on center.

That's going to give us a measurement right at 2". It's going to include the nut and the flat washer for each stud. The wiring design is going to contain your lead wires and your ground wire. If we take a look at the dimensions, the overall length is going to give us a measurement of 6 1/4". The width is going to measure 4 3/4" and then the depth is going to measure 2 11/16". The light is going to draw 0.268/.144 amps at 12.8 volts.

If you need a light for the right hand side of your trailer, you can find that right here at etrailer.com. Using part number STL2RB. We're going to go ahead and hook it up to our external power source and show you what it looks like with power running to it. With our overhead lights turned off. Now, here on the back, it does have indicators to tell you what wire is for what function. The brown wire is going to be for our tail light

Awesome product from an awesome store. Product arrived just as described. Packing was great and looks just like I expected them to from the etrailer.com web site. Will get them installed and reviewed further. Hopefully this time, some bonehead won't back into my trailer in the parking lot of the boat ramp. Thanks etrailer for the great service. 216936

Comments

A year later and just as good as the day I installed them. Thanks etrailer.com

1 YEAR LATER **Ted** - 08/04/2016

19918

by: **Gipsyman** 04/24/2015

Very well packed for shipping. Looks and feels like a high quality light. It is not as bright as I hoped though. I measured it with a lux meter at one meter distance. Readings were as follows: 200 lux for tail light and 425 lux for brake light. That is more than double my incandescent bulb lights which were poor. Our eye perceives light on a logarithmic scale though so double is not much. The leds have a narrow bandwidth of light which is much more annoying (attention grabbing), which is a big plus. The leds also are instant on, so no more warming up a filament to create a brake light. Overall it's a good light. 188050

by: **Art F** 06/01/2017

Just received and installed this light today. Replaced 7 year old lights on my utility trailer hoping to not have to mess with light bulbs anymore. The light works as it should, it's nice and bright, arrived in a reasonable time frame, was packaged well, and hopefully will last. I have ordered many items from etrailer and have never had a problem. 387509

(35 reviews)

Price: \$34.36**In Stock**[Click to Enlarge](#)by: **Ken B.** 08/11/2012

I just installed and tested them. They installed quite easily. They are nice looking and bright. They seem to be well built. We'll see how these are after a couple years. My last set were also L.E.D. type (but not this brand). I thought, barring any accidents, they would last many years. They didn't. They did last longer than the incandescent type though. Vibration seems to be the biggest enemy for trailer tail lights. 51370

by: **S Lewis** 02/06/2017

All ordered items worked great. Love the LED tail lights. Didn't have any problems fixing the trailer thanks to the many technical articles I found on etrailer. Not sure what happened with UPS shipping since I got notified that the parts had shipped on Saturday but didn't get them till Wednesday evening (paid extra for 3 day shipping), but definitely recommend ordering from etrailer. 341397

by: **Mike K.** 07/26/2015

Had a damaged light on my trailer and decided to go with LED this time, so I replaced both sides. Very easy to install. Wires were color coded and matched my harness. Looks and works great. I was not able to find the LED in 80" plus size in local store for some reason. Only could find the 80 and under model. etrailer came through for me. Would buy from them again. 214563

by: **CJ C** 05/29/2014

Haven't installed yet but seems to be great quality. I ordered from E trailer via telephone and Marcia went above and beyond answering my questions and even contacting the manufacturer to get the info I needed. Will definitely order from E trailer again! 133374

by: **Federico** 03/15/2015

With very few boat launches in sea and salt waters the lamps lost more than 80% of the LEDs. I turned them in for replacement and received the new ones under warranty. Will test again to see if I got a bad batch initially only.... 178312

Over 80" Wide, Square LED Trailer Tail Light with License Plate Light, 8-Function, 23 Diode, LH

(35 reviews)

Price: \$34.36**In Stock**by: **Patrick** 04/23/2018

Great replacement part. The extended side lamp makes it easy to see in side view mirrors looking back. Only wish the grounding wire was internal and tapped into the mounting screw. 499683

by: **Sam B** 07/23/2017 **1 YEAR LATER**

Does the job very well. The side marker extends out more than I like, but I understand that this is a design that replaces rear and rear side markers on over 80" wide trailers. 409523

by: **Kevin** 03/27/2016 **1 YEAR LATER**

The LED trailer lights arrived as promised. It was easy to install and has been a huge improvement over the original lights installed by the trailer's manufacturer. 241953

by: **Ed** 07/19/2011

Website order went thru great! Received 3-5 day shipping upgrade! Received shipment on time and with no damage! Great service will do business with them again!!! 19693

Ask the Experts about this Optronics Trailer Lights

Do you have a question about this Trailer Light?

Tow Dolly Replacement Lights

For your old car dolly, you may be interested in the Replacement Driver's Side Fender for Roadmaster RM3477 Tow Dolly with Electric Brakes - Metal # RM-922004 and # RM-922005. For similar lights you can use the Peterson Square Trailer Tail Light, 7-Function, Left Hand # 432400 and # 432200. For light from the sides instead of reflectors, you can use the Over 80" Wide, Square LED Trailer Tail Light, 7-Function, 18 Diode, Right Hand # STL2RB and left hand # STL3RB.

[view full answer...](#)

Options to Replace Square Tail Lights with LED lights for Over 80 Inch and Under 80 Inch Trailers

If your trailer came with the square Peterson lights then you can use the Submersible LED Trailer Light Kit, # TLL9RK. The Over 80 designation that you see is a federal guideline for trailers that are over 80 inches wide, and extra lighting is required for these trailers. You should check federal and state lighting guidelines if you are not sure that your trailer has the correct lighting installed on it. At this time we do not have an LED version of the Over 80 inch square tail light...

[view full answer...](#)

Square LED Trailer Lights and 5-Way Wiring Harness for a Wesco Boat Trailer

Over or under 80 means 80 inches of width. There are certain lighting requirements if the trailer is more than 80 inches wide. Trailers that are less than 80 inches wide can still use lights that are indicated as over 80 inch. Since you need a 5-way wiring harness I recommend getting the lights separately, # STL8RB and # STL9RB, and then getting # A25W5B for the harness. This is a 5-Way wishbone harness. That means that the running light pin has 2 wires for running lights on each side...

[view full answer...](#)

Fender and Trailer Light Recommendations for a 7 x 10 foot Utility Trailer

After looking at all the lights you referenced you should be good for trailer lights on your 7 by 10 foot utility trailer. You might check your local DOT though just to be sure as regulations can vary by area. Cincinnati Axle Trailer Fender - 16 Gauge Steel - 13inch to 14inch Wheels # F775X28-1R Over 80inch

Over 80" Wide, Square LED Trailer Tail Light with License Plate Light, 8-Function, 23 Diode, LH

(35 reviews)

Price: \$34.36**In Stock**

[Recommended LED Trailer Lights to Replace Some Incandescent Trailer Lights on Large Trailer](#)

You absolutely can mix LED and Incandescent lights on your trailer. For your PM444 replacements, I recommend the Optronics Over 80" Wide, Square LED Trailer Tail Light, 7-Function, 18 Diode, Right Hand # STL2RB and Left Hand # STL3RB. The LED lights will draw less power and will also get rid of the bulb replacement hassle you mentioned. In rare cases you may experience hyperflashing with LED lights. If this happens when you install these lights, you can simply add a load resistor...

[view full answer...](#)

[Does the Replacement Tail Light Lens # AL8RB-1G Go to a Light with License Plate Function](#)

The Replacement Tail Light Lens for STL2RB and STL3RB # AL8RB-1G is a replacement for both the Optronics Right Hand # STL2RB and Left Hand # STL3RB lights as is indicated by the title. The part # STL3RB does have the license plate light function built-in to it.

[view full answer...](#)

[How Waterproof is the Over 80" Wide, Square LED Trailer Tail Light # STL2RB](#)

The Over 80" Wide, Square LED Trailer Tail Light # STL2RB that you referenced is designed to be a submersible light. What that means is that once you got to the boat ramp you would want to disconnect your trailer wiring from your tow vehicle and then you could back your boat trailer into the water and the lights will be totally fine. The LEDs are sealed so that water would not get to them. This light would be exactly what you need. For the left hand side you would want part # STL3RB.

[view full answer...](#)

[Version of the License Plate Light part # STL2RB with License Plate Light Below it](#)

The matching drivers side light to the part # STL2RB which is part # STL3RB has the license plate light underneath it like you need.

[view full answer...](#)
